

Rajnish Kumar *Java Developer*

✉ rajnish0147r@gmail.com ☎ 7508492409 📍 Gurugram, India 🌐 LinkedIn 🔄 LeetCode 🏆 HackerRank

📁 PROFILE

Backend Developer with ~3 years of experience designing and building scalable microservices and RESTful systems using Java and Spring Boot. Strong experience in **multi-tenant architectures, caching strategies (Redis), and API gateway design**. Proven ability to improve system performance, handle concurrent workloads, and design maintainable backend systems. Adept at solving complex problems with a focus on scalability, reliability, and clean architecture.

🔧 TECHNICAL SKILLS

Backend: Java, Spring Boot, Spring Security, Hibernate, JPA, REST APIs, gRPC, Microservices Architecture, Multi-tenancy

Distributed System & Tools: Redis (Caching), Kafka / RabbitMQ (Messaging), API Gateway, Docker

Database: MySQL, PostgreSQL, MongoDB

Other: Maven, Git, Postman, Log4j, SLF4J

Frontend (Supporting): Angular, TypeScript, JavaScript, HTML, CSS

📁 WORK EXPERIENCE

Hostbooks Limited

Software Development Engineer

February 2024 – April 2026
Gurugram, India

- Designed and developed a **Pro-Inventory microservice** from scratch, managing inventory lifecycle with multi-tenant database support.
- Implemented **Redis-based caching (read-heavy optimization)**, reducing API latency by ~40% and significantly lowering database load.
- Built a **centralized API Gateway** for routing, authentication, and request validation across microservices.
- Designed and integrated **multi-tenancy architecture**, enabling tenant-specific configurations and database isolation.
- Developed a **Notification Service** for centralized error handling and alerting, improving system observability and reducing downtime.

Jr. Java Developer

November 2022 –
January 2024
Gurugram, India

- Developed **100+ REST APIs** supporting frontend-backend communication for enterprise applications.
- Optimized backend performance by **20–30%** through query tuning, efficient data handling, and code refactoring.
- Built and maintained **Angular-based UI components**, ensuring smooth integration with backend services.
- Delivered high-priority features under tight deadlines with **zero critical production issues**.

📁 PROJECTS

Transport Management System (TMS)

- Role:** Backend Developer
- Designed and developed a system for **route optimization, freight management, and shipment tracking**.
- Implemented route optimization logic (graph-based approach), improving delivery efficiency.
- Built scalable backend APIs handling real-time tracking and logistics data.
- Collaborated with cross-functional teams to ensure seamless integration and performance optimization.

Enterprise Microservices Architecture

Role: Backend Developer

- Built and maintained multiple **scalable microservices** handling business-critical workflows.
- Designed **API Gateway for secure service-to-service communication**.
- Implemented **Redis caching** and optimized DB queries to improve response time.
- Containerized services using **Docker** for consistent deployment across environments.

Online Nursery Plant Management

- Role :** Jr. Java Developer
- Developed backend modules for **user authentication, product management, and order processing**.
- Designed REST APIs for customer and admin workflows.
- Implemented validation and data handling for smooth user experience.

EDUCATION

Masai School, Full Stack Web Development

February 2022 –
November 2022

Punjabi University, B.Tech

August 2015 – August 2019
